LISA

GROUND-TO-GROUND ACOUSTIC SCORING SYSTEM

Technical specifications

- 8 acoustic sensors
- Frequency: 868 Mhz
- Autonomy: 12 hours
- Operating temperature:
  -10°C to +45°C
- High tolerance to external conditions: rain, snow, dust, sand
- Calculation of the projectiles velocity
- Accuracy: < 5 cm
- Grids reference displayable according to the telescopic sight click
- Shots with positive and negative slope

Training system

LISA is a ground-to-ground acoustic scoring system designed for marksmen training, operational regardless of the external conditions.

### Highly precise scoring information

Instantly after shooting, all the scoring information are available on a touchscreen display: the exact position of the shots in or out of the target within a 3 meters radius area, the projectile velocity, the coordinates of the target and the shooter, and the exact distance of the target.

Caliber detection

LISA detects all calibers used by marksmen : from 5,56 OTAN to 12,7 mm. The maximum shooting distance is based on the caliber, that must always be supersonic.

Ergonomic equipment with a reduced size, LISA is delivered with its suitcase (including all the pre-assembled equipments), in order to facilitate transport operations.

About LISA
LISA is an innovative system developed in partnership by Secapem and SAS DRAGON AUTO SYSTEM teams. It is dedicated to the various applications of marksmen like trainings, settings or also performance control of the ammunition packs.

About SAS DRAGON AUTO SYSTEM
Created in 2012, SAS DRAGON AUTO SYSTEM is specialized in mobile and reactive targets. SAS DRAGON AUTO SYSTEM is in charge of marketing aspects.

About Secapem
Created in 1957 in France, Secapem is a world leader in design and production of live fire training solutions.
We can provide air-to-air, air-to-ground, and ground-to-air solutions; including scoring systems and maintenance services.
